Part III DETAILED ACTION

Claims 1-18 are currently pending.

Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, drawn to first method for modulating peptide immunigenecity, classified in class 702, subclass 19.
- II. Claim 18, drawn to second method for modulating peptide immunigenecity, classified in class 702, subclass 19.

The inventions are distinct, each from the other because of the following reasons:

The method of group II has different steps as it requires the step of analyzing native fold and stability of a variant protein not required for method of Group I.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Art Unit: 1631

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
